I. Scale Description

The Behavior Screen for Siblings is a 24-item instrument developed by the Fast Track Project. It was administered to the next youngest sibling of each study child when she/he had completed kindergarten and had been in the care of the primary caregiver for at least two years. The parent is asked to evaluate the occurrence of behavior problems on a 4-point scale (Never, Almost Never, Sometimes and Often).

II. Report Sample

These analyses were conducted with the first cohort on the high-risk control sample (n=155) and on the normative sample (n=387, N=463 with overlap) from the sixth year of administration of this study. Due to the nature of the measure, data were collected only on the siblings of the target children who fit certain criteria, as noted above. As such, data were collected on 72 siblings in the control sample and 153 siblings from the normative sample for a total N of 189, with the overlap. None of these records were missing the entire measure.

III. Scaling

One scale, a total score, was computed as the mean of all the items (1-24). Cronbach's alpha

coefficients for the *Behavior Screen for Siblings Total Scale* for the normative and control samples are:

	Normative Sample	Control Sample
Behavioral Screen for Siblings –Total (BSS6SIB)	0.93	0.93

The reliability coefficients for the *Total Scale* were high for both samples.

IV. Differences Between Groups

T-tests conducted on the control and normative (excluding the overlap) samples indicated no significant differences between the samples for the *Total Scale*.

Comparison of Means for Normative and Control for BSS Y6								
Variable	Label	Normative		Control		DF	t Value	Pr > t
		Mean	Std Dev	Mean	Std Dev			
BSS6SIB	Behavioral Screen for Siblings Total Score-BSS-Yr6	2.10	0.53	2.19	0.54	187	1.03	0.3034

V. Recommendations for Use

The *Behavior Screen for Siblings* scale has good internal consistency as shown by the Cronbach alpha correlation coefficient. It is recommended that the normally-distributed total scale score be utilized in analyses.

VI. Item and Scale Means and SD's

Behavioral Screen for Siblings, Year 6: Normative Sample, Item Means

Variable	Label	N	Mean	Std Dev	Minimum	Maximum
