Scored: OSE19

I. Survey Description

Overview of Sexual Experiences is a 37-item questionnaire used in Wave XIX. The participant answers questions about sexual intercourse and the partner's gender; knowledge about contraceptives; forced sexual contact; sexual orientation; comfort in discussing contraceptives and safe sex with partners; whether the participant has been diagnosed with any sexually transmitted diseases and/or has been tested for HIV or other sexually transmitted diseases.

II. Report Sample

These analyses were conducted on the first cohort on the high-risk control sample (n = 125) and the normative sample (n = 254) for the nineteenth year of the study. The distribution of respondents by site was as follows: for the control sample, 36 were from Durham, 26 were from Nashville, 36 were from Pennsylvania and 27 were from Washington. For the normative sample, 75 were from Durham, 47 were from Nashville, 73 were from Pennsylvania and 59 were from Washington.

III. Scaling

No scales are constructed for this measure.

VI. Items Frequency Tables and Means and Standard Deviations

The tables below follow the logic of the questionnaire by displaying frequencies by sample type (High and Low Risk) and sexual experiences. This is followed by means and standard deviations for the continuous variables measuring number of sexual partners and frequency of diseases by sample group (normative and control).

	High or low risk sample	
	HI	LO
Q491. Which of the following best describes your CURRENT situation at the moment?		
Married and living together with spouse	16	34
Living with a partner	30	55
Engaged and living together	10	19
Engaged and not living together	3	14
Have one girlfriend/boyfriend/dating one person regularly	20	50
Dating one or more people (at least once a week)	6	4
Dating one or more people (one or more times a month)	6	6
Not dating and have no girlfriend/boyfriend	26	63
Divorced	1	2
Separated from spouse	3	1
Prefer not to answer	4	6

Q492. How many times have you been married? If you have never been married, please enter "0".

V. Recommendations for Use

The user is warned that a single respondent reports having being married 10 times. The user is encouraged to test for associations for variables measuring discrete characteristics regarding sexual experiences.
