SAS program to create derived dataset

I. Scale Description.

The Teacher Practices Questionnaire: This is a questionnaire administered to teachers having cohort 1, 2, or 3 target children in their classroom during academic years 1994-1995, 1995-1996, 1996-1997, and 1997-1998. This corresponds to grades 4 and 5 for most of the sample. The questionnaire consists of 27 items meant to assess teacher practices, values and classroom-level assessment: classroom activities focused on community service, conflict resolution, teacher goals and priorities for classroom instruction, and comparison of the social competence of the current class to previous classes. Items are codes on item-specific 5-point scales. For most questions, 0 indicates low priority to goals promoted by the Paths curriculum and 4 indicates high priority to these goals. Values are reversed where needed to reflect this orientation.

II. Report Sample

The reason this data was collected was to assess the effectiveness of the universal intervention. As Durham is not included in the assessment of the universal interventions after Grade 1 (some schools stopped the universal program), it is not included in the analyses.

The current analyses are based on data for years 5 and 6 data for all cohorts. Most responses were for grades 4 and 5 and the data for the two years were reorganized to keep teachers for these grades together. Where a grade 3 teacher was interviewed because of a retained target child, the observation was deleted. In addition, erroneous interviews of grade 6 teachers were also deleted.

School structure varied among sites. At Nashville, most students enter middle school at grade 5. Data was only collected from two middle schools that were assigned to intervention status, with the exception of three additional observations from a third middle school. PATHS was taught in classrooms where a target intervention child was present. Therefore, the intervention status of the teacher was determined by whether the Educational Coordinator collected PATHS implementation data for the teacher that year, and not by school status. In addition, all middle schools (Grade 5) in Nashville consist of a mixture of children from both control and intervention elementary schools. Analysts need to be aware of this situation when dealing with this data set.

III. Scaling of Constructs

Items on this measure were constructed to assess 3 constructs. These are:

Teacher assessment of their class as compared to previous years on the social-emotional climate (TGC1 through TGC9).

Classcompare is the mean of TGC1 through TGC9.
(Cronbach's alpha Grade 4 = .94, alpha Grade 5 = .95).

Teacher weighting of different educational goals in their philosophy and practice (TGG1 through TGG6).

Goal questions were dichotomized to reflect categories for little emphasis (0, 1, 2) or greater emphasis (4, 5). These variables are indicated with a 'D' at the end of the variable name. Each variable is analyzed separately.

Teacher Management of conflict between students (items see below)

Three scales for how mediation of classroom conflicts were resolved were created;

Classmed is the mean of TGS2, TGS3E, and TGS4E
(Cronbach's alpha Grade 4 = .71, alpha Grade 5 = .74).

Studentmed is the mean of TGS3A and TGS4A.
(Cronbach's alpha Grade 4 = .56, alpha Grade 5 = .54).

Teachmed is the mean of TGS3B and TGS4B.
(Cronbach's alpha Grade 4 = .49, alpha Grade 5 = .61).

Note that at least 50% of the items included in the scales were required for the subject to have a scale score. Otherwise, the scale was considered missing.

IV. Recommendations for Use

The purpose of this data is to assess the universal portion of the Fast Track study. It could be used for with additional teacher information for particular research questions not necessarily connected with the Fast Track intervention goals. Subscales were conceptually created by grouping items with particular PATHS objectives and not based on prior analyses. Many of the items have distributional issues that analysts should consider. Also, it should be noted there is no information as the to absolute level of conflicts in a particular classroom so a frame of reference is difficult to ascertain when evaluating teacher responses.

V. Item and Scale Means and SD's

Grade 4

Variable	Label	N	Mean	Std Dev	Min	Max
