I. Scale Description

The Parent Satisfaction Questionnaire is a 19-item measure which assesses parental satisfaction with the Fast Track intervention. Parents are asked to rate each item along a four-point scale, ranging from "harmful" (1) to "very helpful" (4). Items coded as "no basis" (0) were excluded from analyses. The PRS was completed by intervention families only, beginning in Year 2 for Cohorts 2 and 3, and in Year 3 for Cohort 1.

II. Report Sample

This technical report is based upon Year 7, High-Risk Intervention sample, Cohort 3 data. With missing cases excluded, the total N was 102. Twenty eight parents (22% of Cohort 3 Intervention families) were missing observations for the entire measure.

The distribution of cases by site was as follows: 28 parents from Durham, 22 parents from Nashville, 30 parents from Pennsylvania, and 22 parents from Seattle.

III. Scaling

Scaling was derived from the Technical Report generated on Grade 2 data in which seven scales (four of

which are individual items) were designated on an a priori basis. Item 15 was excluded from scaling. In year 7 Item 3 “School Home Notebook” was missing for all respondents. This item was removed from the parent Intervention Scale. Scales with more than one item were calculated by taking an average of the items comprising the scale if 50% or more of the item responses were available. These scales, items that compose them and internal consistencies (Cronbach’s coefficient Alpha) are provided below. Scales consistent of a single item were not constructed to avoid redundancy.

Scales Reliability

| Scale | Cronbach Alpha | N |
|--|----------------|----|
| Parent Interventions (Items 1,2,4,5 and 6) | .81 | 70 |
| Home Visit Intervention (Items 9-11) | .81 | 80 |
| Tutor Intervention (Items 13-14) | .52 | 54 |

IV. Recommendations for Use

The scales on this measure may be used as a gauge of parents’ reported satisfaction with specific aspects of the Fast Track intervention, as well as with the overall intervention. The ns vary by scale as a result of not all families receiving all components of the intervention. Tutor intervention scale must be used with caution.

V. Item and Scale Means and SD's

Items coded as “0” corresponding to “No basis” were excluded from these computations.
