I. Survey Description

Neighborhoods and Government Programs is a 41-item questionnaire used in Wave XIX. Questions were derived from the NLSY study. The participant answers questions about housing ownership, sources of income, membership to Armed Forces and a large spectrum of government transfers, if any.

II. Report Sample

These analyses were conducted on the first cohort on the high-risk control sample (n = 125) and the normative sample (n = 254) for the nineteenth year of the study. The distribution of respondents by site was as follows: for the control sample, 36 were from Durham, 26 were from Nashville, 36 were from Pennsylvania and 27 were from Washington. For the normative sample, 75 were from Durham, 47 were from Nashville, 73 were from Pennsylvania and 59 were from Washington.

III. Scaling

No scales are constructed for this measure. However, overall height measured in inches is computed.

VI. Items Frequency Tables and Means and Standard Deviations

Tables below follow the logic of the questionnaire by displaying frequencies by sample type (High and Low Risk) and housing ownership, sources of income and government transfers.
